

## IoE Gateway board

Gateway board for Internet of Everithing

The IoE Gateway board provide local network to remote server gateway features.

Local network interface include LR-WPAN 802.15.4, and wired interfaces, such as CAN, RS485, USB

Remote communications is done through 2G/3G/4G. The board can mount cellular modules from several leader manufacturer.

**MediCon**

*Measurement & digital Control*

## Technical data

Caratteristiche tecniche

Mode of operation	Board to board / Mainboard plug-in / Stand-alone
Power supply	5V - 12V
SIM Card	SIM Card Holder with ejector OR SIM on chip
Led	Power Supply  Cellular connectivity  External supply voltage
Connectivity Conessioni	CAN RS485 USB - FS
Wireless	2.4GHz IEEE 802.15.4™ compliant connectivity, for worldwide and unlicensed operation
Antenna connectors	SMA connector U.FL-R-SMT
